

Global Call Forward User Guide

Multiple Features Bringing Perfect Ease Of Communications

Single and personalized number starts with '8'

You can forward all your calls to a local or overseas mobile, fixed line number or voice mail. It saves you a lot as compared with mobile IDD roaming rate.

Call Hunting

Allow you to forward incoming calls to a maximum of four local/ overseas fixed line telephone numbers or even your mobile or pager numbers to follow you all the way. Non-received calls will be automatically forwarded to the next pre-selected number you have sequenced.

If any of the pre-set Call Hunting number has been forwarded to voice mail or other telephone number, the Call Hunting function may not be operating properly on that Call Hunting number.

Voice Mail

Store up to 20 messages to ensure that you will not miss any important calls.

Hong Kong Ring Tone

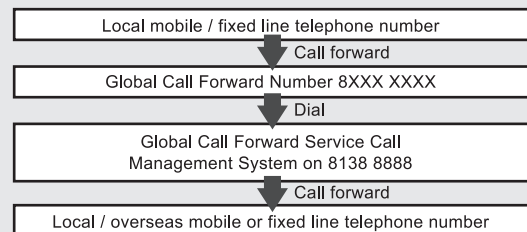

Callers will hear the familiar Hong Kong ring tone to assure your privacy.
Provision of Hong Kong ring tone depends on the answer signal from the overseas network provider.

Call Barring

You are able to block incoming calls from up to 10 pre-set local mobile or fixed line telephone numbers.

The feature is not applicable to Private Branch Exchange (PBX) number(s).

Instruction of Global Call Forward
